

MISSION

It is our mission to carry out world-class nanoscience research for the competitive growth of the Basque Country.

VISION

NanoGUNE is envisioned as a multidisciplinary excellent research center that is internationally renowned for its state-of-the-art research and its contribution to the global competitiveness of the Basque Country. Crucial to realizing this vision is (i) nanoGUNE's synergy with other Basque research and technological centers and (ii) the facilitation of a Basque industry that increasingly takes advantage of the development of nanoscience and nanotechnology.

CORE VALUES

- ✓ *Constant search for excellence in all areas of activity: research, technology transfer, cooperation, training, services, and communication.*
- ✓ *Employees in a participatory environment. Our employees represent our main source of success.*
- ✓ *Openness and universality from the perspective of our commitment to the Basque Country.*

José M. Pitarke
Director-General
